

## Node Js

```
const express = require("express");
const bodyParser = require("body-parser");
const app = express();
app.use(bodyParser.json());
app.use(bodyParser.urlencoded({ extended: true }));
app.get("/", function (req, res) {
  res.sendFile(__dirname + "/registerForm.html");
});
app.get("/form-submit", function (req, res) {
  res.send(req.query);
});
app.listen(3000);
```

## HTML form

```
<div class="card">
  <div class="card-header">Sample Form</div>
  <div class="card-body">
    <form method="GET" action="/form-submit">
      <div class="mb-3">
        <label>First Name</label>
        <input type="text" name="first_name" id="first_name" class="form-control" />
      </div>
      <div class="mb-3">
        <label>Last Name</label>
        <input type="text" name="last_name" id="last_name" class="form-control" />
      </div>
      <div class="mb-3">
        <label>Email Address</label>
        <input type="text" name="email_address" id="email_address" class="form-control" />
      </div>
      <div class="mb-3">
        <input type="submit" name="submit_button" class="btn btn-primary" value="Add" />
      </div>
    </form>
  </div>
</div>
```
